Profile Summary

Passionate and driven B.S. Computer Science student (6th Semester) with a strong aspiration to build a career in Cyber Security. Currently developing practical skills through certifications, hands-on labs, and self-study. Eager to apply knowledge and hardworking attitude in a real-world security environment. If given any opportunity, I will deliver my absolute best with dedication and enthusiasm.

Education

Bachelor of Science in Computer Science (B.S. CS)

Currently enrolled — 6th Semester | [Specializing in Cyber Security](#)

Training and Certifications

Cisco — Introduction to Cyber Security

Covers foundational cyber security concepts including threats, vulnerabilities, and organizational security practices.

Basics of Networking

Fundamentals of computer networks, protocols, IP addressing, and network infrastructure.

Linux Unhatched (Cisco NetAcad)

Introduction to the Linux command line, file navigation, permissions, and basic system administration.

SOC Analyst Path — HackTheBox Academy *(In Progress)*

Hands-on Security Operations Centre (SOC) training covering threat detection, log analysis, and incident response fundamentals.

Technical Skills

- **Operating Systems:** Linux (command line, file system, permissions), Windows
- **Virtualization:** VirtualBox / VMware — hands-on experience setting up and managing virtual machines
- **Networking:** TCP/IP, basic network protocols, IP addressing
- **Security Concepts:** Cyber threats, vulnerability basics, SOC operations (in training)

Practical Projects & Self-Study

Home Lab Setup

Built and configured a personal home lab using virtual machines on a personal laptop to practise Linux administration, networking, and security tool exploration in a safe, isolated environment.

HackTheBox SOC Learning Path

Actively working through HackTheBox Academy's SOC Analyst path — completing modules on SIEM tools, log analysis, and incident response workflows.
